

Geunyeong Kaitlyn Yoo

608-692-9036 | 02kaitlyn@gmail.com | Madison, WI

Education

University of Wisconsin-Madison

Bachelor of Science in Data Science

Madison, WI

September 2022 – May 2026

University of Wisconsin-Milwaukee

Coursework in Supply Chain and Operations Management

Milwaukee, WI

September 2021 - May 2022

Relevant Experience

University of Wisconsin Survey Center

Data Analytics Intern

Madison, WI

April 2025 – May 2026

- Analyzed large-scale survey datasets using SQL and Stata to identify trends, evaluate population segments, and support data-driven decision-making across multiple projects
- Created data visualizations, analytical reports, and stakeholder-ready summaries highlighting key metrics, predicted outcomes, marginal effects, and confidence intervals
- Cleaned, validated, and maintained complex datasets, resolving inconsistencies and ensuring accuracy across analytical deliverables
- Translated statistical findings into clear, actionable insights for technical and nontechnical stakeholders
- Collaborated with senior researchers to manage ad hoc requests, document analytical processes, and deliver outputs within project deadlines

Korean Business Student Association

Business Strategy Project Lead

Madison, WI

January 2023 – December 2023

- Led an eight-member team in developing a startup business strategy, overseeing market research, financial planning, task allocation, and project execution
- Conducted customer, competitor, and market analysis to identify target segments, assess growth opportunities, and support strategic recommendations
- Developed financial projections and a go-to-market strategy to evaluate business feasibility and long-term growth potential
- Presented the final business proposal to a judging panel and earned first place among five competing teams
- Coordinated team responsibilities, milestones, and deadlines to ensure timely completion of project deliverables

Leadership & Activities

Dot Data Science

Data Science Project Member

Madison, WI

January 2024 – May 2026

- Applied Python, statistical modeling, and data visualization techniques through collaborative projects and technical workshops
- Analyzed behavioral, social, and sports-related datasets to identify trends, evaluate predictive models, and communicate findings
- Participated in projects involving neural networks and sports outcome prediction, strengthening skills in predictive analytics and model interpretation
- Presented analytical results to peers with varying levels of technical expertise

Unikists, Korean Band Association

Executive Board Member

Madison, WI

January 2024 – December 2024

- Managed event budgets, tracked expenses, and maintained financial records to support planning and effective resource allocation
- Coordinated schedules, staffing, equipment, and logistical requirements for multiple large-scale events
- Collaborated with team members to assign responsibilities, monitor deadlines, and resolve operational issues
- Supported successful event execution by aligning budget, resource, and scheduling needs across stakeholders

Skills & Certificates

Technical Skills: SQL, Python, R, Stata, Microsoft Excel, Microsoft PowerPoint, Microsoft Word

Data Analysis: Data Cleaning, Statistical Analysis, Regression Analysis, Data Visualization, Trend Analysis, Predictive Modeling

Business Skills: Market Research, Budget Tracking, Resource Planning, Reporting, Stakeholder Communication

Languages: Korean, English, Mandarin Chinese

Certifications: Inside LVMH Certificate — LVMH; Data Analytics Certificate — Google
